

FLUORESCENT FITTING
SURFACE

VECTOR

Vector has a unique 3D design batwing profile, it can provide 10% extra brightness while being ultra slim and light weight. It has an anti-static elongated end cap as well as registration dimples for linear alignment. Ideally for general lighting applications such as supermarkets, schools, cabinet lighting application.

Feature includes:

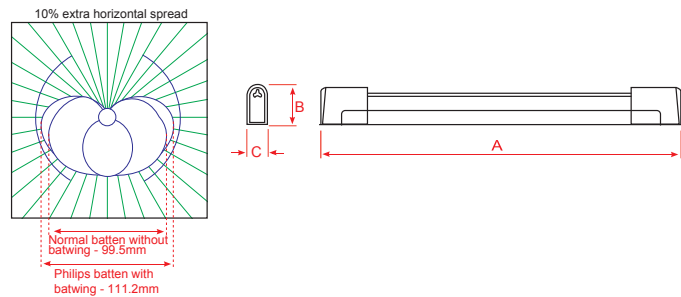

Polycarbonate material finishing.

Polycarbonate slide-in type end cap with coupling grips.

Click fit slider or direct screw type is provided.

Easy installation and less wiring required.

Instant flicker free electronic operation.
